

Important Biosecurity Information for Farm Visitors

Please help keep our farms free from pests, diseases and weeds by following these simple guidelines:

Please DO NOT:

- Touch or feed food scraps to any animals you may encounter
- Walk off the designated pathways into production areas
- Bring your pet dog along on farm visits

Please ensure you:

- Park your vehicles in the designated parking area
- Obey all farm biosecurity signs and other instructions
- Let the farm owner know if you have recently been in contact with diseased plants or sick animals
- Check your vehicle, shoes and clothing are clean before entering and after leaving the farm
- Wash and disinfect hands before and after coming into contact with livestock, plant material or soil

People can carry diseases, pests and weed seeds without realising. Always ensure as a visitor, you are taking appropriate hygiene measures when coming into contact with plants, livestock, or entering production zones
